GUARDRAIN

It makes the condensate treatment plant intelligent by monitoring the operation of the entire system.

It makes predictive diagnoses and signals the onset of problems by communicating the anomaly to the servicing people in charge.

Guardrain is an IoT device capable of connecting the condensate drains installed on board of compressed air systems, making them surprisingly intelligent.

Easy to install and configure, **Guardrain** allows to moderate the communication within and outside the system and monitor its global efficiency, thus offering a detailed system's situation in real time.

Guardrain allows to diagnose in a predictive way the occurrence of anomalous events or malfunctioning of the elements inside the system and notify them to the user.

Guardrain allows considerable savings both during installation and during use, avoiding inefficiencies and system downtime.

Guardrain can work with the whole range of SMART condensate drains (LD100S - LD200S - LD203S)

RANGE SMART

Power and Technical data

Power supply	Power supply	24V dc
	Max. consumption (Peak)	40 W
	Min. consumption (Standby)	4 W
Temperature	Working temperature	+1/+60 °C
Processor	CPU	ARM cortex - A7 Quad-core 1.2 GHz
Memory	RAM	256MB DDR3 SDRAM
	HD	1 micro SD 8GB
I/O interfaces	Ethernet	1 x 10/100 Mbps - RJ45
	USB	1x Host 2.0
	CAN	1 x can bus M12 5 pin female A-Type
	Alarm	1 x contact bus NO/NC, M12 5 pin male B-Type
Radio interfaces	Wi-Fi	IEEE 802.11 b/g/n
Other	RTC	Yes
	LED	Supply /LED status
	Sensors	Temperature, Humidity, Pressure
	Key	1 x Reset
Certifications	Regulations & Standards	EC
Mechanical	Case	Material: Anodized Aluminium - Color: Orange
	Weight (g.)	522
	Sizes (Lenght/Depht/Height)	180x47x83
Code	95-100	

LOGIDRAIN 100

«ZERO-LOSS» drain system.
No wastage of compressed air.

Compact design,
minimal space required.

Optimal price-
performance ratio.

Adjustable to different power
supply voltages.

Integrated filter
to collect contaminations.
Easy to clean and maintain.

FKM (fluoroelastomer)
diaphragm.

Electronic condensate drains

LogiDrain 100 is an innovative system of automatic condensate drainage, designed to apply on compressors, aftercoolers, dryers and filters.

LogiDrain 100 integrates all the solutions suited to guarantee the drain operation without clogging or waste of compressed air by using a highly reliable level sensor, a large orifice with a servo controlled fluoroelastomeric diaphragm and an integrated stainless steel filter to hold impurities. Easy to clean and maintain.

LogiDrain 100 is extremely easy to install, even in very small spaces thanks to its compact size and user-friendly “Easy Lock” connection system. It is possible to realize various connection systems to fit the product at each specific application: in this way you can optimize the installation and at the same time minimize handling costs.

Available in **SMART** version which fits for the Guardrain

LD100

SMART LD100S

- Easy-lock connection

- Hose holder with flow limiter

- Integrated filter to collect contamination

LD100	230 V	115 V	115 V UL	24 V	24 Vdc	24 Vdc
Power supply (±10%)	230 V (50/60 Hz)	115 V (50/60 Hz)	115 V (50/60 Hz)	24 V (50/60 Hz)	24 V (50/60 Hz)	24 V (50/60 Hz)
Power consumption (during drainage)	10 VA					10 VA
Operating pressure	0,2-16 bar					0,2-16 bar
Operating temperature	+1/+60 °C					+1/+60 °C
Protection class	IP65 (with connector and correctly assembled basket)					IP65 (with connector and correctly assembled basket)

Code	15-152	15-151	15-155	15-153	15-154	15-170

(1) = Data refer to 1000 mbar(a), 20° C and 60% relative humidity. Operating pressure 7 bar and outlet temperature of the aftercooler 35° C.

LOGIDRAIN

«ZERO-LOSS» drain system.

No wastage of compressed air.

«revolving Easy-lock» connection,

adjustable for vertical and/or

horizontal connections.

Integrated filter to collect
contaminated condensate.

Easy to clean and maintain.

FKM (fluoroelastomer) diaphragm.

Remote alarm connection.

Available in different
supply voltages.

Hard coated receiver resistant to
more aggressive condensates.

Electronic condensate drain with digital level control

The new series of **LogiDrain** level drains has been designed to solve the problem of condensation water drainage from production plants and compressed air distribution systems. The specific technology applied permits a controlled drainage of condensation water without any compressed air leaks.

LogiDrain is equipped with an integrated storage receiver inside which a level sensor has been mounted and is controlled by an intelligent electronic circuit. All drain functions are displayed on a control panel. A test button is available on the control panel for manual drainage.

LogiDrain starts working as soon as a sensor detects water at max. level and controls the opening of the solenoid valve in order to take the water level back down to a minimum value, leaving a small residual quantity to prevent the system from discharging compressed air. In case of trouble, the control circuit unlocks the drain pipes by carrying out a series of forced opening/closing cycles of the solenoid valve. If this is not enough, the problem is reported outside by an alarm with potential-free contact that can be used to draw the attention of maintenance staff in order to instruct the plant control logic.

LogiDrain is produced in several models with different flow rates. All versions are suitable for working with any type of condensation water even the most aggressive one or water containing a high percentage of oil. A built-in cup of filter, that is easy to clean, prevents the solenoid valve from clogging.

LD200L and LD203 models available in **SMART version which fits for the Guardrain.**

LD101 COMPACT

- Easy-lock connection

- Hose holder with flow limiter

- Integrated filter to collect contamination

LD101 COMPACT	230 V	115 V	115 V UL	24 V	24 Vdc

AUTODRAIN

Compact design,
adjustable for very low
points of the plant.

Self-calibrating
discharge timing.

Optimal price-
performance ratio.

Integrated filter
to collect contamination.

FKM (fluoroelastomer)
diaphragm.

Automatic self-calibrating condensate drain

AutoDrain is an automatic drain able
to discharge condensation cyclically.

AutoDrain has a built-in timed
electronic circuit, a condensation
sensor and an assisted-drive solenoid
valve, which opens at preestablished
intervals. The opening time varies
according to the actual quantity of
condensation at the installation point.
This allows to limit compressed air
waste to a minimum.

AutoDrain does not require setting
waiting and discharge times since
the product is totally self-calibrating.
The front control panel (version 950)
contains two LEDs displaying power
supply and drain state. A button
permits to control the drain manually.

AutoDrain is extremely small and
can be installed at any position
and anywhere in a compressed air
installation.

To make its installation easier
AutoDrain includes an industrial
connector (ex DIN 43650) for power
supply and an Easy Lock three-part
fitting for pneumatic connection.

AutoDrain 925	230 V	115 V	24 V ac/dc
Power supply ($\pm 10\%$)	230 V (50/60 Hz)	115 V (50/60 Hz)	24 V ac/dc

TIME DRAIN

Compact design,
minimal space required.

Precise and intuitive
programming.

Optimal price-
performance ratio.

Integrated filter to collect
contamination.

FKM (fluoroelastomer)
diaphragm).

Timed condensate drain

TimeDrain is an automatic drain system capable of removing cyclically condensate water. TimeDrain integrates a digital timer and a servo-controlled solenoid valve, which is periodically opened according to T-on and T-off times planned by using its control panel.

TimeDrain makes time regulation extremely precise thanks to its selector with eight different sectors which enables the choice among eight different pause times (T-Off) and a button for setting three drainage levels (T-on). The same button has a double testing function, useful to check if the drainage system works correctly.

TimeDrain has a really small size and it can be installed in each kind of position and at each point of the compressed air plant.

In order to make the installation much easier **TimeDrain** is equipped with a DIN 43650 plug for connecting to the power supply and an Easy-Lock connection inlet for connecting to the pneumatic system.

TimeDrain	230 V	115 V
Power supply	230 V (50/60 Hz)	115 V (50/60 Hz)
Power consumption (during drainage)	10 VA	
Operating pressure	0,2-16 bar	
Operating temperature	+1/+60 °C	
Protection class	IP65 (with connector and correctly assembled gasket)	
Electrical connection	EN 175301-803 Type B (ex DIN 43650) (Supplied)	
Nominal flow rate (m ³ /min) (1)	60	
Nominal discharge (lt/h)	40	
Maximum discharge (lt/h)	40	
Maximum compressor capacity (m ³ /min)	60	
Maximum dryer capacity (m ³ /min)	120	
Maximum filter capacity (m ³ /min)	600	
Inlet connection	1 x R3/8"M	
Outlet connection (with flow limiter)	ø10 mm	
Weight (kg)	0,18	
Certificates	n/a	
Code	45-885	45-886

(1) = Data refer to 1000 mbar(a), 20° C and 60% relative humidity. Operating pressure 7 bar and outlet temperature of the aftercooler 35° C.

SEP DRAIN

Water /oil separator

SepDrain is suitable to separate oil from condensate into air compressed systems.

SepDrain is the very new condensate separator ready to offer you:

- 100% performance even on new synthetic compressor lubricants
- simplified maintenance
- concentrations of outgoing oil below 10 ppm/l
- saving-space solution
- recycled and eco-friendly materials
- high reliability

• Twin system

Its **Twin System** technology will allow you to double or triple the condensate treatment capacity and reduce the amount of residual contaminant.

HTD

HIGH PRESSURE TIMER DRAIN

Timer-controlled Condensate Drain

- ✓ Compact design
- ✓ Simple to install and fully automatic
- ✓ Two potentiometers to set T-on and T-off to suit any size of devices
- ✓ Two LEDs allow to visualize the operating status
- ✓ Test button to drain the condensate manually and check the valve function
- ✓ NPT connection available for version 115V Ac
- ✓ Supplied with connector plug type A (DIN43650A ISO 440/6952)
- ✓ NC 2/2 way direct acting valve (made in Europe)

Size

The dimensions may vary when using different types of valves.

COMPACT TIMER DRAIN

Timer-controlled Compact Condensate Drain

- ✓ Compact design
- ✓ Simple to install and fully automatic
- ✓ Large vent for a reliable discharge
- ✓ Configured with an integrated ball-valve and strainer with double inlet thread (1/2" M and 1/4" F), easy to clean
- ✓ Two potentiometers to set T-on and T-off to suit any size of compressed air devices
- ✓ Two LEDs allow to visualize the operating status
- ✓ Test button to drain the condensate manually and check the valve function
- ✓ NPT connection available for version 115V Ac
- ✓ Supplied with connector plug type A (DIN43650A ISO 440/6952)
- ✓ Supplied with hose holder
- ✓ NC 2/2 way direct acting valve
- ✓ CE approved and UL certified (e488201)
- ✓ Supplied with hose connector

MFD

MECHANICAL FLOAT DRAIN

Mechanical Condensate Drain

- ✓ Simple and reliable product
- ✓ Suitable to any air compressed points (air compressor, aftercooler, pressure vessel, dryer, filter)
- ✓ Works with oil-contaminated condensate (unsuitable to oil-free applications)
- ✓ Power connection not required
- ✓ No air loss
- ✓ Simple to install and fully automatic. Requires no configuration or testing
- ✓ ½" female connections
- ✓ Supplied with inlet ½" male adapter fitting
- ✓ Manual exhaust to drain condensate manually and check the valve function
- ✓ Operating pressure up to 16 bar
- ✓ EC (CE) approved
